

Failing to use proper fall protection is a frequently cited violation by VOSH & OSHA.

VOSH/OSHA compliance is not optional.

Compliance under VOSH and OSHA is not an item to place on a back burner. Non-Compliance could expose your employees to hazardous situations resulting in serious injury or possibly death in addition to the financial burden associated penalties and fines. In order for your company to be VOSH/OSHA compliant, certain job tasks require written Health & Safety Programs.

Managing the health and safety of all employees requires acceptance, practice and complete understanding of the policies. The development and implementation of an effective health and safety program requires an understanding of what it should look like when it's finished.

Loss Control Innovations is dedicated to providing information along with practical and affordable solutions for your safety program.

Who We Are

About Us

Jack Sullivan has 39 years of service in safety, loss control and emergency services. Jack is a Certified Safety Professional (CSP), a Certified Fire Protection Specialist (CFPS) and an OSHA Outreach Instructor. Jack has been a featured presenter at many local, regional and national conferences and training programs.

Monica Vannoy has more than 20 years of experience in industrial hygiene, loss control, and occupational safety and health. She is a Certified Safety Professional (CSP), a Certified Environmental, Safety and Health Trainer (CET), a Master Certified Violence Prevention Specialist (VPS), and a former Registered Environmental Health Specialist (RS). Monica is experienced in many industries including general industry, construction, environmental, and power plant startup/power generation.

Curtis Stacy has more than 25 years working in an industrial environment, 18 of which were in Occupational Health and as a Safety Specialist. He has worked in emergency 911 systems in both Virginia and North Carolina as a National Registry Paramedic. Curtis has completed the Manager of Environmental Safety and Health (MESH) and the Advanced Safety Certificate (ASC) programs given through the Safety Council of North Carolina. Curtis is a Certified Occupational Hearing Conservationist (COHC) and is certified by the Council for Accreditation in Occupational Hearing Conservation (CAOHC).

*We don't just follow the standards.
We set the standards!*

What do you do if VOSH/OSHA shows up at your site?

Here are a couple of items to think about...

- Are you prepared for a surprise VOSH/OSHA inspection?
- What would their inspectors find?
- Do you or your employees know how to handle such a visit?
- Do you have a written Health & Safety Plan?
- Is your training up-to date?
- Who would you reach out to for assistance?

LCI can help!

Think that you can't afford to have a safety program?

Think again! Providing a safe and healthful workplace is a cost of doing business that cannot be avoided – being proactive with worker safety and protecting the job site/facility/equipment should be among your highest priorities to keep the cost low and your employees productive. With the rising cost of Workers Compensation insurance rates and an increase in the fines and penalties for VOSH/OSHA regulation violations, you cannot afford not to have an effective Safety Program

“Let LCI be your Health & Safety Department, long or short term, you decide.”

Long term, Short term we got you covered.

If a full time safety manager is not in the budget. LCI can assist you by providing part-time consulting services offering program development, training, inspections, documentation, safety manager mentoring and all the services necessary to get you company on the path to VOSH/OSHA compliance.

From the construction site to the factory floor, LCI has the experience to assist you in all your Health & Safety service needs.

Our Services Include:

- On site audits & Inspections
- GHS & Hazard Communication
- Confined Spaces
- OSHA Outreach Training for General Industry & Construction
- Incident Investigation
- Employee Safety Manuals
- OSHA/VOSH Written Plans
- Contractor Safety Manuals
- And much More!
